6th International Disaster and Risk Conference

Integrative Risk and Disaster Management – Towards Resilient Cities

28 August – 01 September 2016

Davos • Switzerland

Call for Abstracts

IDRC Davos 2016 will build on the outcomes of the UNISDR Science and Technology Conference held in Geneva end of January 2016 and will further develop the S&T Road Map. Scientists, practitioners, and policy makers from the various science and technology fields and from all geographical regions, at local, national, regional and international levels are invited to submit abstracts for oral or poster presentations.

Main topics in the context of urban areas:

- Natural hazards
- Technological risks
- Environmental/ biological risks
- NaTech risks
- Critical infrastructures
- Terrorism
- Sovereign risk financing tools, insurance
- Harmonization of DRR and climate change adaptation

Cross-cutting themes:

- Vulnerability and resilience
- Safety and security
- Education, training, capacity building
- Inclusion and equity in DRR (gender, disabilities, migration, etc)

Submit your paper by 16 May 2016
