ISO/TC 223 Scope

- International standardization in the area of societal security, aimed at increasing crisis and continuity management and capabilities through technical, human, organization, operational, and management approaches as well as operational functionality and interoperability, as well as awareness amongst all interested parties and stakeholders.
- ISO/TC 223 will work towards international standardization that provides protection from and response to risks of unintentionally, intentionally, and naturally caused crises and disasters that disrupt and have consequences on societal functions.
- The committee will use an all-hazards perspective covering the phases of emergency and crisis management before, during, and after a societal security incident.

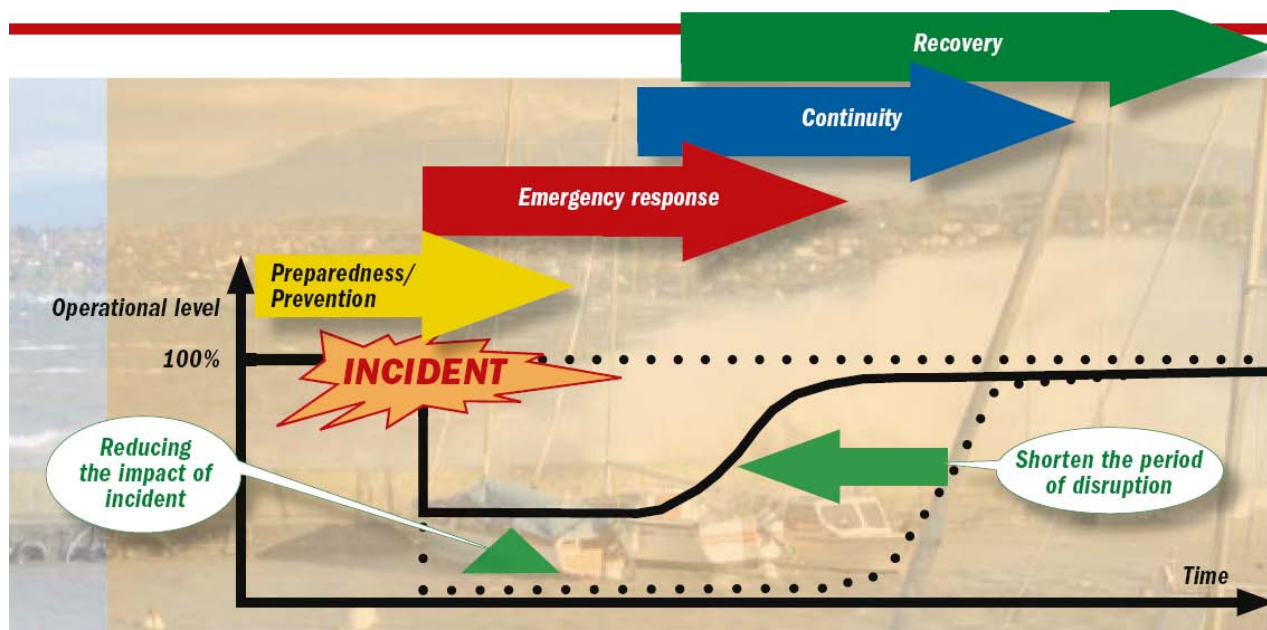

ISO/TC 223 Organization

First deliverable: ISO/PAS 22399:2007

Guideline for incident preparedness and operational continuity management

Ongoing work

- **ISO/NP 22300** Fundamentals and vocabulary
- **ISO/NP 22301** Preparedness and continuity management systems - Requirements
- **ISO/WD 22320** Principles for command and control in resolving incidents
- **ISO/WD 22321** Essential information and data requirements for command and control
- **ISO/WD 22322** Inter/intra organizational warning procedures
- **ISO/PWI 22397** Public/Private partnerships
- **ISO/PWI 22398** Procedures for training and exercises
- **ISO/CD 22399** Guideline on IPOCM
